

Approach for Continuous Medical Technology Education (CMTE)

Approaches:

1. In-house training by lab manager and lab staff
2. Refresh training on safety, analyzer, LIS.....
3. E-competency: Create slide with quiz
4. On-line training
5. Special lecture by inviting speaker to provide training
6. Knowledge sharing after attending course with MoH/Partners
7. Others

Use any approach to fit your laboratory

Two Categories of training

Training with Plan

- Create training plan
- Set topic
- Select trainer
- Have an evaluation after training
- Fit to plan
- If cannot do as plan, do it later
- Keep a record in personnel file

Unplan Training

- Get training from anywhere
- Share knowledge to team members
- Evaluate after training
- Set timeline to each person to share
- Keep a record in personnel file

Example of training plan
