External Quality Assurance program in Cambodia settled down in cooperate between Ministry of Health/Department of Hospital Services/Bureau of Medical Laboratory Services with supporting from partners since 2012 till today is the value step for strengthening Health System in Cambodia complying with National Strategy Plan and IHR-JEE Action Plan. The PT (sample) were provided by PPTC (Microbiology, Serology, Blood Bank), One World Accuracy (Biochemistry and Hematology) and Sysmex (Hematology) to National Reference Laboratory/NIPH, to distribute to laboratories who joined the EQA program.

Output:

Sharing experience and lessons learned from stakeholders to help reaching the requirement for accreditation and ISO. Finding problem and do corrective action for improvement. Even today NIPH laboratory could produce some PTs for EQA sites supporting technical by the above provider (PPTC, One World Accuracy and Sysmex), but for sustainable the program, NIPH laboratory should become the provider of EQA sample (PT).

Report of the workshop

The meeting was being held at President Hotel in Battambang province from 03-04 November 2018.

136 participants:

Participants from national and provincial of CPA1 & 2 (Director and lab manager and/or lab staffs), BMLS/DHS, ITECH, DMDP, WHO, NAMRU, FM, HOPE, Private Lab, and other with opening remark by Director of PHD Battambang, Dr. ROEUN Bunreth.

- Overview of EQA and Result and Gap of EQA 2017 2018 were shown by Dr. SAU Sokunna.
- The participants from 5 facilities who join EQA program have reviewed theirs lessons learn in Hematology, Biochemistry, Serology, Blood Bank and Immunology (The overall, identify Problems, Gap and Corrective Actions).
- EQA and IQC on Microbiology and corrective actions sharing experience from DMDP.
- EQA and IQC on Biochemistry, Serology, Immunology sharing experience from ITECH.
- EQA and IQC on Hematology sharing experience from Calmette Hospital.
- How to enroll to join in EQA program + NIPH plan for Cambodia EQA corrective actions

Result:

- NIPH should is one of the Media Preparation Center to supply other national and provincial lab as NIPH is the reference lab.
- Suggest to NIPH cooperate with BMLS, to develop one TOOL and work together shoulder to shoulder for evaluation of laboratory quality.
- Strengthening lab staffs for upgrade the capacity by in service training
- Follow up corrective action
- Waste management in Hospital is very important to limit the infection contamination in Hospital
- Suggestion: Maintenant the equipment for sustainable of the lab quality process.
- Lesson learn of storage positive sample (1month) for in-house IQC.
- Lesson learn of dilution sample positive for testing the capacity of test strip reaction.
- Information system: data management is important to show the issues and improvement of annual achievement, but avoid exaggerated data. Suggest the hospital director focus on this matter!
